

Nikhil Verma

Data Analyst

Indore, Madhya Pradesh · [Phone] · [Email] · [Website or LinkedIn]

PROFESSIONAL SUMMARY

B.Sc. Statistics graduate with a six-month analytics internship at a retail chain, writing SQL queries and building weekly sales dashboards in Power BI. Cleans messy transaction data in Python, explains trends in plain language and double-checks numbers before sharing. Seeking an entry-level analyst role in retail, e-commerce or consumer finance.

SKILLS

SQL · Power BI · Excel pivot tables · Python (Pandas) · Data cleaning · Descriptive statistics · DAX basics · Stakeholder reporting

EXPERIENCE

Data Analytics Intern — Regional supermarket chain with 40 stores, Indore
6-month internship

- Wrote SQL queries on roughly two million monthly billing rows to track category sales, footfall and average basket value by store.
- Built a Power BI dashboard for store managers that replaced a manually emailed Excel report and refreshed automatically every morning.
- Identified eleven stores with repeated stock-outs in dairy, and the supply team adjusted reorder levels after reviewing the analysis.

EDUCATION

B.Sc. Statistics — Government autonomous college, Indore
Coursework in regression, sampling and probability

Class XII, Science (PCM) — CBSE senior secondary school, Ujjain

CERTIFICATIONS AND REGISTRATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- NPTEL course in Python for Data Science

PROJECTS

- Mandi price tracker — scraped wholesale onion and soybean prices and charted weekly volatility across five Madhya Pradesh markets
- Loan default classifier — trained a logistic regression model on a public lending dataset and explained key risk factors
