

Farhan Qureshi

Freelance Full-Stack Developer

Hyderabad, Telangana · [Phone] · [Email] · [Website or LinkedIn]

PROFESSIONAL SUMMARY

Independent full-stack developer with six years of client work building web apps, dashboards and API integrations for startups and export businesses. Handles scoping, fixed-price proposals, delivery and post-launch support end to end. Specialises in Laravel, Vue and AWS, with a track record of long-running retainers and clean handover documentation.

SKILLS

Laravel · Vue.js · MySQL · AWS EC2 and S3 · Payment gateway integration · API design · Project scoping · Client communication · GST invoicing

EXPERIENCE

Freelance Full-Stack Developer — self-employed, serving clients in India, the UAE and the UK, Hyderabad

4 years · current

- Delivered 35 projects on fixed-price and hourly contracts, with 70 percent of revenue coming from repeat or referred clients.
- Built an order management portal for a textile exporter that replaced spreadsheets and cut dispatch errors by half.
- Maintains monthly support retainers for six clients, covering security patches, uptime monitoring and small feature requests.
- Wrote technical proposals with milestone-based pricing, reducing scope disputes and late payments across engagements.
- Holds a top-rated status on a global freelancing platform with consistent five-star reviews over the past three years.

Contract Developer — Series-A edtech startup, Remote

1 year 4 months

- Rebuilt the course checkout flow in Laravel and Vue, lifting completed payments by 18 percent within two months.
- Migrated file storage to AWS S3 with signed URLs, trimming monthly hosting bills and securing paid video content.
- Mentored two in-house junior developers through code reviews and weekly architecture walkthroughs.

PHP Developer — mid-sized IT services company, Hyderabad

1 year 8 months

- Developed modules for a hospital billing product used across 12 client sites in South India.

- Wrote SQL reports that finance teams at client hospitals used for daily cash reconciliation.
- Upgraded legacy modules to a newer PHP version, removing deprecated functions flagged during a client security audit.

EDUCATION

B.Tech, Information Technology — state technological university, Hyderabad

CERTIFICATIONS AND REGISTRATIONS

- AWS Certified Developer – Associate
- Laravel Certified Developer

PROJECTS

- Clinic booking system — appointment and reminder app used by a chain of dental clinics handling hundreds of bookings each week
- Open-source GST invoice package — PHP library for generating compliant tax invoices, used in several small-business apps
