

Abdul Rahman Khan

Medical Lab Technician

Aurangabad, Maharashtra · [Phone] · [Email] · [Website or LinkedIn]

PROFESSIONAL SUMMARY

DMLT holder with a six-month internship in the central lab of a 200-bed multi-speciality hospital, rotating through haematology, biochemistry and serology. Comfortable with venepuncture, sample labelling, cell counters and semi-auto biochemistry analysers, and follows biomedical waste rules. Looking for a lab technician role in a hospital or diagnostic centre.

SKILLS

Phlebotomy · Sample collection and labelling · Haematology cell counter · Semi-auto biochemistry analyser · Blood grouping and cross-matching · Urine and stool examination · Quality control charts · Biomedical waste handling · LIS data entry

EXPERIENCE

Lab Technician Intern — 200-bed multi-speciality hospital, central laboratory, Aurangabad
6-month internship

- Collected blood samples from 30 to 40 outpatients a morning and labelled each tube with barcode and patient details.
- Ran CBC samples on a five-part haematology analyser and prepared peripheral smears for review by the pathologist.
- Recorded daily internal QC values for biochemistry tests and reported out-of-range controls to the senior technician.
- Followed colour-coded biomedical waste segregation and helped prepare the lab for an internal audit.

Collection Centre Assistant — Diagnostic chain collection centre, Aurangabad
3 months · part-time

- Registered patients, collected samples and packed them with ice packs for courier to the processing lab.
- Kept the sample dispatch register and called patients when a repeat sample was needed.

EDUCATION

Diploma in Medical Laboratory Technology (DMLT) — Government-recognised paramedical institute, Aurangabad
Practical examination: first class

Higher Secondary (Science, Biology) — State board junior college, Jalna

CERTIFICATIONS AND REGISTRATIONS

- Registration application with state paramedical council in process

- Basic Life Support, certified course

PROJECTS

- Hand hygiene audit — observed and charted hand hygiene compliance in the sample collection area for the infection control nurse
