

Mohit Grover

Senior QA Automation Engineer

Chandigarh · [Phone] · [Email] · [Website or LinkedIn]

PROFESSIONAL SUMMARY

QA engineer with eight years of experience testing banking, insurance and e-commerce applications, moving from manual testing to leading automation. Builds Playwright and Rest Assured frameworks, runs them in CI and leads a team of five testers. Cares about catching defects early, keeping regression suites fast and giving developers bug reports they can act on immediately.

SKILLS

Test automation strategy · Playwright and Selenium · Rest Assured API testing · JMeter performance testing · Jenkins and GitHub Actions · Test planning and estimation · Defect triage · SQL · Mobile testing with Appium · Team mentoring

EXPERIENCE

Senior QA Automation Engineer — Insurance technology company, Mohali

4 years · current

- Built a Playwright and TypeScript framework covering 1,400 UI and API scenarios for the policy purchase and claims portals.
- Cut full regression from three days of manual effort to a 90-minute nightly run in Jenkins with parallel execution.
- Introduced risk-based test planning per release, which lowered production defects reported by customers.
- Lead five testers, review test cases and run weekly defect triage with developers and the product owner.

QA Engineer — E-commerce platform for electronics, Gurugram

3 years

- Ran JMeter load tests before sale events, finding a cart service bottleneck that engineering fixed ahead of launch.
- Automated payment and order APIs with Rest Assured, adding checks for refunds and partial cancellations.
- Tested Android and iOS releases with Appium on a device farm, tracking crashes by device model.

Test Engineer — IT services company, banking client team, Chandigarh

1 year

- Executed functional and regression tests for an internet banking upgrade, including fund transfer limits and OTP flows.

- Validated back-end data with SQL after batch jobs and raised mismatches with the database team.

EDUCATION

MCA — University department of computer science, Chandigarh

B.Sc. in Computer Science — Government college, Ludhiana

CERTIFICATIONS AND REGISTRATIONS

- ISTQB Advanced Level Test Automation Engineer
- ISTQB Certified Tester Foundation Level

PROJECTS

- Flaky test clean-up — tagged and fixed unstable tests, raising the nightly pass rate to a steady level the team trusted
- Test data service — built a small API that creates policies and users on demand for automated tests
